

## mobile cone crusher plant (portable crusher)

### Introduction to the [mobile crusher](#) plant(portable crusher)

The **cone crusher mobile plant** we company have developed is a series of novel rock crushing equipment ,which have also expanded the crushing concept in the coarse and fine crushing area .And the design principle of **cone crusher mobile plant** is based on the customers point and have taken the obstacles the complicated crushing plant bring to the customers as the primary solution plan, which have really provided the hardware operation project with the advantages of convenience, high-efficiency and low operation cost.

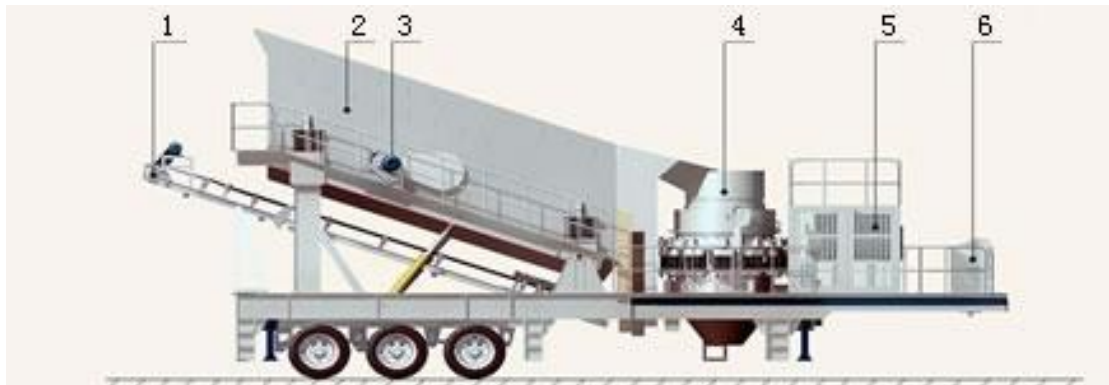

### Technical features of mobile crusher plant([portable crusher](#))

This series of **cone crusher mobile plant** features large processing ratio, high-efficiency, high adaptability ,mining and screening process, self-conveyor ,etc.

### Main structures of [cone crusher mobile plant](#)(portable crusher)

1. Belt conveyer
2. Vibrating screen
3. Vibrating and screening electric motor
4. Cone crusher
5. Cone crusher electric motor
6. Electric control cabinet

## Application of [Cone Crusher](#)

The [cone crusher mobile plant](#) have been mainly applied in the field of road construction,metallurgy,energy ,city infrastructure and so on.

## Main technical parameters of the cone crusher mobile plant

portable crusher

Structure	Transport dimensions	Work parameters
Crusher EP600X900	Length L1: 12500mm	Motor power: 91.5KW
Vibrating feeder	Width B1: 2450mm	Capacity:
-Length:3800mm	Height H1: 4000mm	Feeder height H3: 4500mm
-Width :960mm	Chassis height H4 : 1720mm	Standard plant
Conveyor	Wheel Chassis height difference H5: 380mm	Length L2: 13150mm
-Standard length: 9500mm	Parallel double axle	Transport height H2: 2700mm
-Lengthened length: 11600mm	Double wheels each sides	Lengthened plant
-Width :650mm	specs 11.00-20	Length L2: 15050mm
	Total weight	Transport height H2: 3100mm
	Standard plant 37650kg	
	Lengthened plant 38000kg
